Bachelor in Architecture and Urbanism.  
federal university of ouro preto

april 2014 - february 2015  
Group of scenic media and scenic research.

mediactors - scenic art department - ufop

### PERSONAL INDICATION

Architect and Urbanist graduated from the School of Mines - Federal University of Ouro Preto (UFOP). During graduation I was a member, during the year 2014 and part of 2015, of the research group (CNPq) HÍBRIDA - hybrid poetics of the contemporary scene, a group that integrates researchers of the scenic arts and other courses in the investigation of concepts, procedures and creative devices concerning the hybrid poetics of the contemporary scene, through their study, problematization and experimentation. Master of the Professional Master's Program in Metallic Construction of the Civil Engineering Department of the same institution. At that time, I researched, explored and evaluated the potential of the use of evolutionary algorithms as an optimization tool integrated to parametric design as a design method, identifying the basic theoretical content, exploring and evaluating this approach in a case study.

### IMPORTANT COURSES

Parametric Architecture Workshop.  
ufop - 2015

Tactical Urbanism Workshop  
indisciplinar ufmg - 2015

Urban Rehabilitation Course focusing on  
Central Areas
